We apologize for the inconvenience.) My Gameplay Video was recorded yesterday on the server and is available here I spent a total of 4 hours in game. The servers are actually open for everyone, but it is possible to experience a very low framerate. The current max server population is higher than Ethereum's blockchain, which is currently less than ten thousand. The maps are broken up into 10 min pvp battles. Each battle is a free for all fight between four players, the winner of the battle is not determined by the first player to reach level 10. Empire and player leveling requires a few free for all pvp battles, as well as the use of the Market.
